GG Development Team				
Pete Cyr	David Peters	Kurt Endress	Laura Gu	Gary Kinard
K Kittell	Mark Millard	Marty Reisinger	Benjamin Haag	Cullen McGovern

*Change control board

Visitors: Erin Galarneau. Bailey Hallwachs

Roll Call

Agenda

Approve minutes from last meeting. Motion to approved MS; Seconded BG

Old Business:

1. Report from DEV: MS is not able to run SQL queries in the PW – will work with BH.
2. Subcommittee reports:
 - Multiple inventories, seasonally available and multiple form (J. Smith) – LG thinks she has resolved the issues and will be testing and will get to the testers.
 - Genetic Observations (C. McGovern) – BH is putting the schema on DEV.
 - NRR (GK, HB, MR, AN and BH) – Nothing unusual to report. It is helpful when sites respond to the NRR committee when they have a question. BG asked how many people respond to the rejection email – not many according to MR. If a site overrides the committee decision, it would be nice to hear back from the site as to why the site decided to approve the order over the NRR committee decision. That would give the

NRR committee information for future orders.

- GIS (L. Taylor) – Nothing to report.
- Barcoding/reports/labels sub-committee (PC) – SQL reporting services issues may not be able to be resolved. May have to do without barcodes on some labels that we can set how many labels that we get (freezer and extra bag labels). This is a result of a mandated software update.
- APR (L. Burke) – Nothing to report.
- Reports – Nothing to report.

New Business:

1. Review inventory action code updates (JB and AN) JB asked for comments on the suggested changes.
2. What does it mean for us to have GG BrAPI compliant?
 - a. Would it affect the way we upload data at all?
 - b. Are there BRApps that we can use? (JB)

Pete – BrAPI is meant for machine to machine communication. Meant for handling data for model organism databases. A way for our data to be used by others.

3. New Moisture codes for NLGRP – CCB approved – LB will enter a ticket.
4. Adding minutes to a GG webpage – Marty will handle this – GV

Future meeting dates:

November 14th
