Changes to GG Project Site

The screenshot shows a web browser window with the address bar displaying `grin-global.org/userdocs.htm`. The page content includes a main text block with a note for GRIN-Global users and a section titled "Documents with Recent Edits" containing five buttons: "CT Login QuickSheet", "CT Login Guide", "Inventory Seasonal Availability", "Attachment Wizard", and "Connecting to GG Servers (database)". A blue mouse cursor is pointing at the "Inventory Seasonal Availability" button. Below this are four topic cards: "Topic List", "Curator Tool User Guide", "Dynamic Folders", and "Searching in GRIN-Global".

Genebank staff using GRIN-Global should familiarize themselves with the documentation, especially the Curator Tool documents and videos. We recommend not printing the documents as they are regularly updated. Where to start? Too many documents! True, but try this one: [Getting Started w/ GRIN-Global](#) Also, be sure to review the [Curator Tool videos](#) and the online [Curator Tool release notes](#).

Note to GRIN-Global (GG) website users: documents listed here are designed for genebank staff using tools only available only to them. On its menu, the GG Public Website has a link to its [Help file](#).

Documents with Recent Edits:

[CT Login QuickSheet](#) [CT Login Guide](#) [Inventory Seasonal Availability](#) [Attachment Wizard](#) [Connecting to GG Servers \(database\)](#)

Topic List

Click on the link to open the file; scroll down on this page to read document descriptions.

- [Alternative Languages \(.PDF\) \(.docx\)](#)
- [Accessions & Passport Data \(.PDF\) \(.docx\)](#)

Curator Tool User Guide

The user guide for the Curator Tool; this document primarily explains the interface of the Curator and the Search Tool. Besides explaining how to use the screens, this document provides an overview on the GRIN-Global (GG) database.

Dynamic Folders

Dynamic Folders explained. The content for the Overview and Methods for Creating Dynamic Folders sections is also covered in the CT User Guide. This document contains additional content: Making Dynamic Folders More Readable and Dynamic Folder Examples. These sections were only

Searching in GRIN-Global

The GRIN-Global Search Tool and Public Website have some commonalities and differences. For example, they share the same engine, but their interfaces are entirely different. This document explains the search capabilities and provides examples of valid search strings.

NPGS GRIN-Global News & Training Page

2023 - Q & A Series

2:00 PM Eastern
(unless otherwise noted)

- **Jan. 26**
What's New with GG/CT?
Recent changes in GG server and CT editions will be highlighted
- **Feb. 02**
Overview of GGCE
Learn about the Crop Trust's new GG Community Edition. A brief demo will be given.
- **Feb. 9**
USDA Pecan Database
Ellen Provin at Brownwood will demo their application used in the Pecan orchard for managing many functions,

ZOOM DIRECTIONS

Unless notified, all Q&As and webinars will be using ZOOM with the following:
<https://www.zoomgov.com/my/gringlobal>
 Meeting ID: **160 3144 7305**

Audio If you prefer using the phone, use ZOOM's call back feature or dial by your location:
 +1 669 254 5252 US (San Jose)
 +1 646 828 7666 US (New York)

Employee Entrance / Exit Checklist

A new employee joining your GG team? Or someone leaving soon? We have a brief list of actions to take. These actions are easy to forget, hence the list - **check it out!**

2023 - Q & A Series

Join us in 2023 for one or many of the Q & A sessions that are held on Thursdays, 2:00 PM Eastern...

Employee Entrance / Exit Checklist

http://grin-global.org/docs/NPGS_staff_entrance_and_exit_checklist.docx

NPGS Staff Entrance and Exit Checklist

This checklist includes NPGS-specific tasks to consider when a curator/curatorial staff enters or exits. It does not replace any location, Area, or ARS checklists.

Task	Contact/Procedure
<p><input type="checkbox"/> Update NPGS-specific group email.</p> <p>As of October 2022, there is a single email group for the NPGS: ARS-GRIN-All. Each site can determine who they want to add to it. At a minimum, all curators should be included in the ARS-GRIN-All group.</p>	<p>[Both Entrance and Exit]</p> <p>Contact any location or Area IT Specialist who has permission to edit ARS Outlook groups.</p> <p>Kurt Endress (kurt.endress@usda.gov) and Matthew Riggs (matthew.riggs@usda.gov) can also update ARS-GRIN-All.</p>
<p><input type="checkbox"/> Obtain access to the Plant Germplasm Operations Committee (PGOC) SharePoint site.</p>	<p>[Both, primarily Entrance]</p> <p>To receive permission, contact Gary Kinard</p>

Add new column to inventory dataview for origin (grow out location) of the inventory lot

The screenshot shows a software interface with a table and a tooltip. The table has the following columns: Propagation Date, Production Location, Note, Name, and Inventory Name. The 'Production Location' column is highlighted with a yellow border. A red box highlights the 'Inventory' tab in the top navigation bar. A tooltip is visible below the table, containing the text: `production_location_geography_id` -- Where the inventory lot was grown or produced - links to the geography table.

Propagation Date	Production Location	Note	Name	Inventory Name
------------------	---------------------	------	------	----------------

`production_location_geography_id` -- Where the inventory lot was grown or produced - links to the geography table

Create triggers for the two Order Request action codes related to Phyto inspection

Description

Create triggers that will auto populate the two newest codes:

ORDER_REQUEST_ACTION.INSPECT_SETUP

ORDER_REQUEST_ACTION.INSPECT_DONE

when the information is filled in the "Setup Inspection date" column and the "Inspected date" in the Order Request Phyto Log.

Cooperator trigger should trim leading and trailing spaces from fields

Server Changes – PW stuff

https://npgsweb.ars-grin.gov/gringlobal/query/weborderdetail?id=59023

70%

Please note that your order may arrive in several shipments when it's distributed from multiple NPGS genebanks. International shipments with accessions from multiple genebanks are usually consolidated for phytosanitary inspection and shipped from Beltsville, Maryland. To reduce shipping delays, international requestors should promptly submit an import permit issued by their national plant protection organization.

Order Request Actions:

Action Date	Action Step	Order Number	Action Note
January 20, 2023	Orders Merged	346366	Order merged with open web request (#59115) - adding 9 new item(s) by Western Regional PI Station (W6), Pullman, Washington, United States by David Van Klaveren (david.vanklaveren@wsu.edu)
January 19, 2023	Order pending	346455	Order request item status changed to PENDING for 1 item(s) by Plant Genetic Resources Conservation Unit, Griffin, GA (S9), Griffin, Georgia, United States by Cassa Munroe (cassa.munroe@usda.gov)
January 18, 2023	New Order	346455	New order created (from web request) with 1 item(s) by Plant Genetic Resources Conservation Unit, Griffin, GA (S9), Griffin, Georgia, United States by Cassa Munroe (cassa.munroe@usda.gov)
January 17, 2023	New Order	346401	New order created (from web request) with 2 item(s) by Northeast Regional PI Station (NE9), Geneva, New York, United States by Sherri Tennes (sherri.tennes@ars.usda.gov)
January 17, 2023	Order shipped	346377	Order request item status changed to SHIPPED for 3 item(s) by National Small Grains Collection (NSGC), Aberdeen, Idaho, United States by Scott McNeil (scott.mcneil@ars.usda.gov)
January 17, 2023	Completed order	346377	Order Request has been marked as COMPLETED by National Small Grains Collection (NSGC), Aberdeen, Idaho, United States by Scott
